Contents of Volume 39

Number 1, August 1981

B. M. GATEHOUSE AND M. C. NESBIT. Preparation and Structure Refinement of KTi_3TaO_9 and $K_3TiTa_7O_{21}$ 1

M. V. RYZHKOV, S. P. KOSTIKOV, I. K. IVANOV, AND V. A. GUBANOV. X-Ray Photoelectron Spectra and Electronic Structure of Rare-Earth Orthovanadates 7

J. PANNETIER AND P. BATAIL. $Pb_4Fe_3O_8Cl$: Synthesis, Crystal Structure, and Thermal Expansion 15

HENRI KESSLER ET SON LY. Interactions magnétiques dans des groupements binucléaires $[Fe_2O_7]^{8-}$ au sein de $Na_8Fe_2O_7$ 22

J. B. ANDERSON, E. KOSTINER, AND F. A. RUSZALA. The Crystal Structure of $Ca_3Cu_3(PO_4)_4$ 29

G. A. M. DALHOEVEN AND G. BLASSE. On the Luminescence of Titanium-Doped Lithium Zirconate (Li_2ZrO_3) 35

J. C. JUMAS, L. FOURNES, M. WINTENBERGER, ET E. PHILIPPOT. Proprietes magnétiques et étude par spectroscopie Mössbauer des tellurites de fer $Fe_2Te_3O_9$ et $Fe_2Te_4O_{11}$: Structure magnétique de $Fe_2Te_4O_{11}$ à 4,2 K 39

ORTWIN GREIS, PETER KNAPPE, AND HORST MÜLLER. Phase Relationships in the Systems SmH_2–SmH_3 and SmD_2–SmD_3 49

JOHN D. CORBETT. Chevrel Phases: An Analysis of Their Metal–Metal Bonding and Crystal Chemistry 56

M. TAKANO, J. KAWACHI, N. NAKANISHI, AND Y. TAKEDA. Valence State of the Fe Ions in $Sr_{1-y}La_yFeO_3$ 75

B. FRIT ET J. P. LAVAL. La structure Pb_3ZrF_{10}: Base pour deux nouvelles series homologues de phases ordonnées derivant de la fluorine par exces d'anions .. 85

OSVALD KNOP AND GÉRARD DEMAZEAU. The 1-6 Weberite $Na_2Te_2O_7$ and Some Observations on Compounds with the Weberite Structure 94

E. SILBERG, Y. STERNBERG, AND N. YELLIN. Cd Diffusion into PbTe 100

A. M. HEYNS, P. W. RICHTER, AND J. B. CLARK. The Vibrational Spectra and Crystallographic Properties of $CsPF_6$ 106

B. L. CHAMBERLAND AND J. B. ANDERSON. The Preparation and Crystal Structure of a $BaRhO_3$ Polytype 114

NINH NGUYEN, JACQUES CHOISNET, MARYVONNE HERVIEU, AND BERNARD RAVEAU. Oxygen Defect K_2NiF_4-Type Oxides: The Compounds $La_{2-x}Sr_xCuO_{4-x/2+\delta}$ 120

JAN-OLOV WILLERSTRÖM AND STIG RUNDQVIST. Coordination and Bonding in Fe_3P–Ti_3P–V_3S–Ta_3As-Type Compounds: The Crystal Structures of Hf_3Sb and h-Ta_3Ge 128

NOTE

E. TAKAYAMA. The System GeO_2–MnO–Mn_2O_3 at 900°C 133

ABSTRACTS OF FORTHCOMING ARTICLES 135

Number 2, September 1981

STAFFAN HANSEN, LARS FÄLTH, AND STEN ANDERSSON. Structural Relationships in Tetrahedral Frameworks: Reflections on Cristobalite 137

JAMES C. HUNTER. Preparation of a New Crystal Form of Manganese Dioxide: λ-MnO_2 142

G. BACQUET, VO QUANG TRUONG, M. VIGNOLES, AND G. BONEL. EPR Detection of Acetate Ions Trapping in *B*-Type Carbonated Fluorapatites 148

V. R. PAI VERNEKER, D. SEETHARAMACHARYULU, AND R. M. MALLYA. Mechanoformation of Ammonium Perchlorate–Potassium Perchlorate Solid Solutions 154

C. MICHEL, L. ER-RAKHO, ET B. RAVEAU. Les oxydes $La_{4-2x}Ba_{2+2x}Cu_{2-x}O_{10-2x}$: Une structure inédite constituée de groupements CuO_4 carrés plans isolés.... 161

W. J. CRAMA. The Cooperative Jahn–Teller Distorted Structure of $RbCuCl_3$ 168

H. IWAHARA, T. ESAKA, T. SATO, AND T. TAKAHASHI. Formation of High Oxide Ion Conductive Phases in the Sintered Oxides of the System Bi_2O_3–Ln_2O_3 (*Ln* = La–Yb)..... 173

B. CLAUDEL, J. P. PUAUX, D. REHOREK, AND H. SAUTEREAU. On the Influence of Gaseous Ammonia on Uranyl Formate 181

P. E. HOLBOURN AND F. W. D. WOODHAMS. A ^{121}Sb Mössbauer Investigation of the Rare Earth Antimonides 186

G. BLASSE, G. A. M. DALHOEVEN, J. CHOISNET, AND F. STUDER. On the Luminescence of Titanium-Activated Stannates 195

JEAN-CLAUDE BRETHOUS, ALAIN LEVASSEUR, GERARD VILLENEUVE, PATRICK ECHEGUT, PAUL HAGENMULLER, ET MICHEL COUZI. Etudes par spectroscopie Raman et par RMN des verres du système B_2O_3–SiO_2–Li_2O..... 199

HAROLD J. WHITFIELD. The Crystal Structure of hcc-CuAsSe 209

KAZUHIRO ENDO, HIDEO IHARA, KAZUHIRO WATANABE, AND SHUN-ICHI GONDA. XPS Study on Valence Band Structures of Transition-Metal Trisulfides, TiS_3, NbS_3, and TaS_3 215

D. TRAN QUI, J. J. CAPPONI, J. C. JOUBERT, AND R. D. SHANNON. Crystal Structure and Ionic Conductivity in $Na_4Zr_2Si_3O_{12}$ 219

Y. ARNAUD ET M. CHEVRETON. Etude comparative des composés TiX_2 (*X* = S, Se, Te): Structures de $TiTe_2$ et TiSeTe..... 230

SHOICHI OKAMOTO. Crystallization and Phase Transformation of Sodium Orthoferrites 240

A. D'HUYSSER, B. LEREBOURS-HANNOYER, M. LENGLET, ET J. P. BONNELLE. La spectroscopie de photoélectrons induits par rayons X et la repartition des ions cuivre Cu^+ et Cu^{2+} dans les ferrites de cuivre..... 246

NOTES

L. BEN-DOR, I. SHILO, AND I. FELNER. $CdEr_2S_4$: Magnetic and Mössbauer Measurements 257

Abstracts of Forthcoming Articles 401

Author Index for Volume 39 405

The Subject Index for Volume 39 will appear in the December 1981 issue as part of a cumulative index for the year 1981.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of this or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5×28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. __ for __ pages of supplementary material. Order from ASIS/NAPS c/o Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, New York 10017. Remit in advance for each NAPS Accession number. Institutions and organizations may use purchase orders when ordering; however, there is a billing charge for this service. Make checks payable to Microfiche Publications. Photocopies are $5.00. Microfiche are $3.00. Outside the U.S. and Canada, postage is $3.00 for a photocopy or $1.50 for a fiche.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5×28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
